Education:

- **Madan Mohan Malaviya University of Technology, Gorakhpur** 2023 - 2027
B.Tech - Electronics & Communication Engg. (Data Science & Machine Learning) CGPA: 7.59 / 10.00
- **Pt. Deen Dayal Upadhyaya Sanatan Dharm Vidyalaya, Kanpur (Class XII)** 2022
Central Board of Secondary Education (CBSE), New Delhi Percentage: 94%
- **Pt. Deen Dayal Upadhyaya Sanatan Dharm Vidyalaya, Kanpur (Class X)** 2020
Central Board of Secondary Education (CBSE), New Delhi Percentage: 91.67%

Experience:

- **Mastermind Algo Trader (YouTube)** 2024 - Present
Founder & Content Creator Remote
 - Founded and manage an active trading education community on YouTube; design and deploy automated trading strategies for algorithmic execution
 - Applied backtesting and model evaluation on historical data using Chartink and TradingView; conducted live trading sessions and created educational content on algorithmic and rule-based strategies
- **Flikt (Startup)** Dec 2025 · 1 Month
Full Stack Developer Intern Remote
 - Developed responsive and user-friendly web application features using React.js, JavaScript, HTML, and CSS, ensuring cross-device compatibility and an improved user experience
 - Integrated REST APIs, identified and resolved application bugs, and optimized performance to enhance functionality and responsiveness
 - Collaborated with the development team using Git/GitHub in an Agile development environment, contributing to feature implementation, code reviews, and project delivery

Projects:

- **Web Development** 2024 - Present
 - 1. **MMMUT Hockey Team Website** [\[Live Demo\]](#) [\[GitHub\]](#) 2025 - Present
Official website for MMMUT's hockey team — central platform for rosters, schedules, scores, results, news, media Remote
 - Tools & technologies used: React, Vite, Supabase (PostgreSQL, Auth, Storage), Vercel
 - Built and deployed official website for MMMUT's hockey team as Hockey Technical Member Head
 - Full-stack Admin Dashboard with 10+ modules for non-technical staff to manage players, coaches, matches, gallery, news, events
 - Implemented Supabase (RLS) for secure role-based content management and public data access
 - 2. **Personal Portfolio Website** [\[Live Demo\]](#) [\[GitHub\]](#) 2025 - Present
Single-page, dependency-free personal portfolio — plain HTML/CSS/JS (ES modules), no framework or build step Remote
 - Tools & technologies used: HTML, CSS, JavaScript (ES Modules), Supabase, Vercel
 - Built dark/light theme (persisted in localStorage), Ctrl/Cmd+K command palette, animated stat counters, and scroll-reveal animations with prefers-reduced-motion support
 - Developed interactive timeline component with expandable "stack used" tags and custom cursor for pointer devices
 - Built contact form with client-side validation and Supabase backend integration (RLS-secured insert-only policy)
 - 3. **Mastermind Algo Trading Platform** [\[Live Demo\]](#) 2024 - Present
Trading mastermind / signals community website — subscription-based platform with live signals, paid courses, and payments Remote
 - Tools & technologies used: Next.js (Vercel), FastAPI (Render), Supabase (Postgres + Auth), Razorpay, YouTube
 - Full-stack deployment: Next.js frontend + FastAPI backend via REST API; Supabase auth/database; Razorpay payments
 - Integrated ABCDE Algo Strategy Backtesting Dashboard [\[GitHub\]](#) [\[Live Demo\]](#) — 5-point A-B-C-D-E liquidity sweep reversal detector (Pine Script v5) with Python/FastAPI backtesting + visualization backend
 - Generates live, strategy-based trade signals in real time for subscribed users based on A-B-C-D-E detection logic
 - Designed rule-based strategies using Chartink/TradingView; Bull & Bear zone detection, liquidity-based entry, standard deviation for volatility zones
- **Machine Learning & Financial Analytics** 2023 - Present

End-to-end ML & DL pipelines for stock price prediction using Scikit-learn and TensorFlow; tracked experiments with MLflow and deployed models via Flask/FastAPI on Docker and AWS

- Tools & technologies used: Python, Scikit-learn, TensorFlow, Flask, FastAPI, Docker, AWS, MLflow, XGBoost
- 1. **Electricity Demand Forecasting** [GitHub] [Live Demo] — XGBoost model forecasting hourly electricity demand on 5 years of weather/calendar data; Flask backend on Render
- 2. **Weather Intelligence App** [GitHub: [frontend](#) + [backend](#)] [Live Demo] — React frontend (Vercel) + ML backend (Render): temperature forecasting, rain prediction, anomaly detection
- 3. **CNN Filter Visualization** [GitHub] — Coursera Guided Project; visualized internal convolutional filters of a CNN using TensorFlow
- 4. **Tesla Stock Price Prediction using Facebook Prophet** [GitHub] — Coursera Guided Project; time-series forecasting of Tesla stock price

Skills:

Languages: C, C++, Python, JavaScript, SQL, HTML, CSS

Developer Tools: GitHub, VS Code, Docker, Arduino IDE

Frameworks: React, Next.js, Scikit-learn, TensorFlow, Flask, FastAPI, MLflow, Pandas, NumPy, Matplotlib, Seaborn, Pine Script v5

ML/DL Concepts: Convolutional Neural Networks (CNN)

Cloud/Databases: AWS, Supabase, SQL (MySQL, PostgreSQL), Render, Vercel

Quant/Trading Techniques: Chartink, TradingView, Monte Carlo Simulation, AdaBoost, XGBoost, Time Series Forecasting, Backtesting, Risk Management, Quantitative Analysis, Credit Analysis, Commodity Pricing, Portfolio Management, Stock Market Analysis

Soft Skills: Problem Solving, Analytical Thinking, Decision Making, Communication, Leadership

Areas of Interest: Financial Markets & Trading, Data Analytics & Machine Learning, Content Creation, Software Development

Position of Responsibility:

- **Founder**, Mastermind Algo Trader 2024 - Present
- **Technical Team Member**, Hockey Association, MMMUT 2023 - Present
- **Volunteer**, National Service Scheme (NSS)

Achievements:

- Solved 120+ problems on LeetCode (200+ across coding platforms)
- Rank 3 & Winner – XM Global Trading Competition (Algorithmic Trading) — ₹45,000 prize — 2026
- Cleared FundingPips Prop Firm Challenge (Phase 1 & 2) – Funded Account – 2025
- Demonstrated consistent algorithmic trading performance and disciplined risk management
- Hockey – UP Zonal Cluster (Rank 3); Chess – Winner, KSS; Volunteer – NSS

Certifications:

- **AI Fundamentals** — Google
- **AI Fundamentals and the Cloud** — AWS
- **Machine Learning: Regression and Classification** — Stanford Online
- **NumPy, SciPy, Matplotlib & Pandas: Machine Learning** — SARA Academy
- **Algorithmic Toolbox (DSA)** — UC San Diego (Coursera)
- **Web Development: CSS, Bootstrap, JS, React** — Udemy
- **C, C++, PHP: Complete Guide to Modern Programming** — Udemy
- **SQL (Advanced)** — HackerRank
- **Goldman Sachs** – Risk Management Job Simulation
- **J.P. Morgan** – Quantitative Research Job Simulation
- **Bank of America** – Global Markets Sales & Trading Analyst Job Simulation
- **Arduino** — Infosys Springboard
- **Microsoft Azure Data Fundamentals (DP-900)** — Infosys Springboard
- **GitHub** — Madan Mohan Malaviya University of Technology
- **NISM Securities Markets Certification** — NISM
- **GenAI Powered Data Analytics Job Simulation** — Tata Group
