[LinkedIn Profile](#)

Education:

- **Madan Mohan Malaviya University of Technology, Gorakhpur** 2023 - 2027
B.Tech - Electronics & Communication Engg. (Data Science & Machine Learning) CGPA: 7.59 / 10.00
- **Pt. Deen Dayal Upadhyaya Sanatan Dharm Vidyalaya, Kanpur (Class XII)** 2022
Central Board of Secondary Education (CBSE), New Delhi Percentage: 94%
- **Pt. Deen Dayal Upadhyaya Sanatan Dharm Vidyalaya, Kanpur (Class X)** 2020
Central Board of Secondary Education (CBSE), New Delhi Percentage: 91.67%

Experience:

- **Mastermind Algo Trader (YouTube)** 2024 - Present
Founder & Content Creator Remote
 - Founded and manage an active trading education community on YouTube; design and deploy automated trading strategies for algorithmic execution
 - Applied backtesting and model evaluation on historical data using Chartink and TradingView; conducted live trading sessions and created educational content on algorithmic and rule-based strategies
- **Flikt (Startup)** 1 Month
Internship Remote
Frontend Developer Intern
 - Built responsive UI components using HTML, CSS, and React; worked on layout design, frontend structuring, and component-based architecture

Projects:

- **Mastermind Algo Trading Platform [[mastermind-algo-website.vercel.app](#)]** 2024 - Present
Trading mastermind / signals community website — subscription-based platform with live signals, paid courses, and payments Remote
 - Tools & technologies used: Next.js (Vercel), FastAPI (Render), Supabase (Postgres + Auth), Razorpay, YouTube
 - Full-stack deployment: Next.js frontend on Vercel + FastAPI backend on Render, connected via REST API; Supabase handles authentication and database
 - Integrated Algo Strategy Backtesting module (linked via in-site button) to the ABCDE strategy backtesting dashboard
- **ABCDE Algo Strategy & Backtesting Dashboard [[GitHub](#)] [[Live Demo](#)]** 2024 - Present
Price-action liquidity-sweep reversal strategy — Pine Script v5 indicator + Python backtesting dashboard Remote
 - Tools & technologies used: Pine Script v5, Python, FastAPI, Next.js, TradingView, Chartink, Pandas, NumPy, MySQL, Monte Carlo Simulation, AdaBoost
 - Built 5-point A-B-C-D-E liquidity sweep reversal detector (two mirrored TradingView scripts) plus a FastAPI backend + Next.js frontend for backtesting and visualization
 - Designed rule-based strategies using Chartink and TradingView; Bull & Bear zone detection, liquidity-based entry, standard deviation for volatility zones
 - Backtested strategies on historical data; automated Monthly R1/S1 pivot level tracking for systematic analysis
- **Machine Learning & Financial Analytics** 2023 - Present
End-to-end ML & DL pipelines for stock price prediction using Scikit-learn and TensorFlow; tracked experiments with MLflow and deployed models via Flask/FastAPI on Docker and AWS
 - Tools & technologies used: Python, Scikit-learn, TensorFlow, Flask, FastAPI, Docker, AWS, MLflow, XGBoost
 - 1. **Electricity Demand Forecasting** [[GitHub: ELECTRICITY-ML-MODEL](#)] [[electricity-demand-predictor.onrender.com](#)] — XGBoost model forecasting hourly electricity demand on 5 years of weather/calendar data; Flask backend on Render
 - 2. **Weather Intelligence App** [[GitHub: frontend + backend](#)] [[weather-app-react-mu-two.vercel.app](#)] — React frontend (Vercel) + ML backend (Render): temperature forecasting, rain prediction, anomaly detection
 - 3. **CNN Filter Visualization** [[GitHub: Visualizing-Filters-of-a-CNN-using-TensorFlow](#)] — Coursera Guided Project; visualized internal convolutional filters of a CNN using TensorFlow
 - 4. **Tesla Stock Price Prediction using Facebook Prophet** [[GitHub: Tesla-Stock-Price-Prediction-using-Facebook-Prophet](#)] — Coursera Guided Project; time-series forecasting of Tesla stock price

- **Personal Portfolio Website [Live Demo] [GitHub]**

2025 - Present

Single-page, dependency-free personal portfolio — plain HTML/CSS/JS (ES modules), no framework or build step

Remote

- Tools & technologies used: HTML, CSS, JavaScript (ES Modules), Vercel
- Built dark/light theme (persisted in localStorage), Ctrl/Cmd+K command palette, animated stat counters, and scroll-reveal animations with prefers-reduced-motion support
- Developed interactive timeline component with expandable "stack used" tags and custom cursor for pointer devices
- Built contact form with client-side validation and Supabase backend integration (RLS-secured insert-only policy)

Skills:

Languages: C, C++, Python, JavaScript, SQL

Developer Tools: GitHub, VS Code, Docker, Arduino IDE, Chartink, TradingView, Prism Live Studio, MS Word, MS Excel, PowerPoint, Razorpay (Payments API)

Frameworks: React, Next.js, HTML, CSS, Scikit-learn, TensorFlow, Flask, FastAPI, MLflow, Pandas, NumPy, Matplotlib, Seaborn, Web Development, Pine Script v5

ML/DL Concepts: Convolutional Neural Networks (CNN)

Cloud/Databases: MySQL, SQL, AWS, Excel (Financial Modeling), Supabase, PostgreSQL, Render, Vercel

Quant/Trading Techniques: Monte Carlo Simulation, AdaBoost, XGBoost, Time Series Forecasting, Backtesting, Risk Management, Quantitative Analysis (Finance), Credit Analysis, Commodity Pricing, Portfolio Management, Stock Market Analysis

Soft Skills: Problem Solving, Analytical Thinking, Decision Making, Communication, Leadership

Coursework: NISM Securities Markets, Financial Risk Management

Areas of Interest: Financial Markets & Trading, Data Analytics & Machine Learning, Content Creation, Software Development

Position of Responsibility:

- **Founder**, Mastermind Algo Trader

2024 - Present

- **Technical Team Member**, Hockey Association, MMMUT

2023 - Present

- **Volunteer**, National Service Scheme (NSS)

Achievements:

- Rank 3 – XM Global Trading Competition (Algorithmic Trading) 2026
- Cleared FundingPips Prop Firm Challenge (Phase 1 & 2) – Funded Account 2025
- Demonstrated consistent algorithmic trading performance and disciplined risk management
- Hockey – UP Zonal Cluster (Rank 3); Chess – Winner, KSS; Volunteer – NSS

Certifications:

- Algorithmic Toolbox (DSA) — UC San Diego (Coursera)
- Machine Learning: Regression and Classification — Stanford Online
- SQL (Advanced) — HackerRank
- Goldman Sachs – Risk Management Job Simulation
- J.P. Morgan – Quantitative Research Job Simulation
- Bank of America – Global Markets Sales & Trading Analyst Job Simulation
- GenAI Powered Data Analytics Job Simulation — Tata Group
- Microsoft Azure Data Fundamentals (DP-900) — Infosys Springboard
- NumPy, SciPy, Matplotlib & Pandas: Machine Learning — SARA Academy
- Finance Data Analysis & Analytics — Udemy
- Web Development: CSS, Bootstrap, JS, React — Udemy
- C, C++, PHP: Complete Guide to Modern Programming — Udemy
- Arduino — Infosys Springboard
- GitHub — Madan Mohan Malaviya University of Technology
- NISM Securities Markets Certification — NISM
